

The Human Performance Index™

The Bridge to Improved Performance

Masterclass Seminar

Companies measure virtually everything, to help them understand how they are performing and how performance can be improved. A key lynchpin in companies' performance is human performance – in terms of how staff act, interact, behave, collaborate and engage with each other in functions, across functions, within and between teams. However, human performance as an overall component of business results is not explicitly measured or tracked. At this Masterclass Seminar you will learn how to measure this, and how to get the best from your human assets.

This Masterclass will be led by Malcolm Follos. Malcolm is an international business consultant working with executive teams from some of the world's leading organisations. He is Managing Director of Sensei UKE and Strategic Partner in Sensei International, a global leadership transformation consultancy firm.
